Portfolio: rudraksha.tech

Skills

- **Languages**: **JavaScript, TypeScript**, HTML, CSS
- **Frontend**: **React, Next.js, Tailwind CSS**, Framer Motion, Three.js
- **Backend**: **Node.js, Express**, REST APIs, MongoDB, Mongoose
- **AI & Data**: **OpenAI APIs, Embeddings, Pinecone**, Vector Search, LLMs
- **Tools & APIs**: **Git/GitHub, CI/CD**, Apollo, SignalHire, React Query, Zustand
- **Testing & Platforms**: **React Testing Library, ESLint**, Linux, Windows

Experience

- **RemoteStar** — Remote
  SDE Intern: TypeScript, Express, MongoDB, Next.js, OpenAI — *Mar 2025 – Nov 2025; Mar 2026 – Present*
  - **MPC Matching**: Designed and shipped a production **candidate-to-company matching engine** using **LLM scoring** and Pinecone semantic search, with function-aware scoring across real open roles.
  - **BD Signals**: Built a weekly pipeline processing **∼16,000 jobs** across **∼2,000 companies**, with freshness filtering, deduplication, change detection, role filtering, and automated staleness handling.
  - **Scale & Reliability**: Reduced matching backfill costs to ∼ $10 using an OpenAI company-size pre-filter; fixed production LLM timeouts by moving long-running work to a **background queue** with bounded polling.
  - **Full-Stack Delivery**: Built MPC profiles, job citations, redacted CVs, and outreach tooling with **Next.js/React**; implemented Apollo contact discovery with SignalHire fallback and caching, and owned CI/CD and production backfills.

- **PRED (PangoLabs)** — Bangalore
  SDE Intern: React, Zustand, Tailwind CSS, React Query — *Nov 2025 – Mar 2026*
  - **Frontend Engineering**: Built production-ready interfaces using **React + Vite**, Tailwind CSS, and Zustand, translating Figma designs into reusable responsive components.
  - **Data & APIs**: Integrated frontend applications with backend services using **React Query**, implementing cached data fetching, loading states, and resilient API-driven UI.
  - **UI Systems**: Developed reusable components and interaction patterns focused on maintainability, consistency, and responsive behavior.

Open Source Contributions

- **Headlamp (CNCF, kubernetes-sigs/headlamp) – Contribution Index**:
  - Shipped **14 merged PRs** to the Kubernetes web UI across CRD components, resource-map relations, router internals, units helpers, resource tables, API-discovery logging, and testing.
  - Contributed to the existing **TypeScript/React** codebase using React Testing Library and ESLint across UI, application logic, and testing infrastructure.

Freelance Projects

- **CompilerTech – Official Website Deployment**:
  - Built and deployed the official CompilerTech website with a responsive, high-performance interface focused on clean **UI/UX**.
  - Tech: **Next.js**, **TypeScript**, **Tailwind CSS**, **Framer Motion**
- **Segfault – Official Hackathon Website Deployment**:
  - Developed and deployed the official Segfault Hackathon website with a dynamic, responsive frontend and scalable component-based interface.
  - Tech: **Next.js**, **TypeScript**, **Tailwind CSS**

Volunteering

- **PointBlank (Coding Club)** — Member
  Frontend Developer: Next.js, TypeScript, Framer Motion, Tailwind CSS, Cloudinary — *Feb 2025 – Present*
  - **Web Development**: Built production pages and reusable UI components for the PointBlank website, including the /lore page and PBCTF registration flow using **Next.js** and **Tailwind CSS**.
  - **UI Systems**: Designed and implemented reusable **Framer Motion** components and responsive interaction patterns used across the website.

Achievements

- **Technical Escape Room (CTF)**: Secured **1st place** among 35 teams in a competitive, time-bound Capture The Flag challenge – March 2025.
- **NER Tech Hackathon**: Selected as a **Finalist** in a national-level hackathon organized by **Amantya Technologies**.
- **Aventus Hackathon**: Selected as a **Finalist** in a hackathon organized by **Dayananda Sagar College of Engineering**.

Education

- **Dayananda Sagar College of Engineering, Bangalore** — Karnataka, India
  Bachelor of Engineering - Computer Science and Engineering — *Nov 2023 – Present*
